## TAMBOLI CASTINGS LEADS CREATION OF A MIYAWAKI FOREST IN BHAVNAGAR

**Bhavnagar, February 24<sup>th</sup>, 2026:** Tamboli Castings Limited, a wholly owned subsidiary of Tamboli Industries Limited, has undertaken an ambitious environmental initiative to nurture a Miyawaki Forest in Bhavnagar, spread over an expansive 13,000 square meters. The project is being executed as part of the company's CSR activities, in collaboration with the Rotary Club of Bhavnagar and the Bhavnagar Municipal Corporation.

Situated adjacent to the picturesque Akwada Lake, the Miyawaki Forest has seen the initial plantation of 28,635 saplings comprising diverse tree species, using the Miyawaki afforestation technique pioneered by renowned Japanese botanist Akira Miyawaki. The method focuses on growing small to large trees in close proximity to each other, enabling dense vegetation to develop swiftly. Within a span of 3 to 5 years, this green cover will evolve into a self-sustaining ecosystem, and will become an 'Oxygen Park' for the citizens of Bhavnagar.

This initiative reflects TCL's broader ESG philosophy: renewable energy integration, carbon accountability, and resource-efficient manufacturing systems supported by structured environmental governance. By embedding these principles into its operations, TCL continues to advance its commitment to sustainability and community well-being.

The Company continues to place equal emphasis on industrial excellence and environmental stewardship. Through projects such as these, the Company reaffirms its dedication to creating long-term value for people, planet, and business.

### ABOUT TAMBOLI INDUSTRIES LIMITED

Tamboli Industries Limited is the principal holding and promoter company of Tamboli Castings Limited (TCL). The Company holds 100% of the equity share capital of its wholly owned subsidiary, TCL, which is a specialist in investment casting (Feinguss) technology. TCL manufactures and supplies fully machined high-precision components catering to diverse industries including Pneumatics & Automation, Pumps, Valves & Turbo Parts, General Engineering, Automotive, and Aerospace applications.
